

QSE POLICY

Labor safety

- Risk reduction and prevention
- Improvement of well-being at the workplace and organizational effectiveness
- Compliance with legal requirements and other requirements or recommendations applicable to our business

Product safety

- Control of manufacturing processes
- Customer satisfaction by taking into account their needs and requirements
- Systematic analysis of dysfunctions and the implementation of effective corrective actions

Equipment safety

- Control and improvement of production tools
- Preventive maintenance and equipment protection
- Periodic monitoring and calibration of equipments

Environment safety

- Improvement of energy performance
- Reduction of our environmental impact: water, noise, wastes (in particular reduction of material losses)
- Compliance with legal requirements and other requirements applicable to our business

« OUR **CONTINUOUS IMPROVEMENT (KAIZEN)** APPROACH IS FOCUSED ON THESE CHALLENGES AND REQUIRES EVERYONE'S PARTICIPATION. IMPROVING COMMUNICATION IS A KEY FOCUS FOR THE YEARS TO COME.»

Valérie PALMAROLE,
Plant Manager

Tsuyoshi URUSHIHARA,
President
